

**Part 1:**

Displacement field applied directly in 1 increment (deformed configuration) -  
(substitute  $\alpha_C = 0$  (3x3 matrix) ;  $DC = 0$  ;  $\alpha_T = 0$  (3x3 matrix) ;  $DT = 0$  in the code)

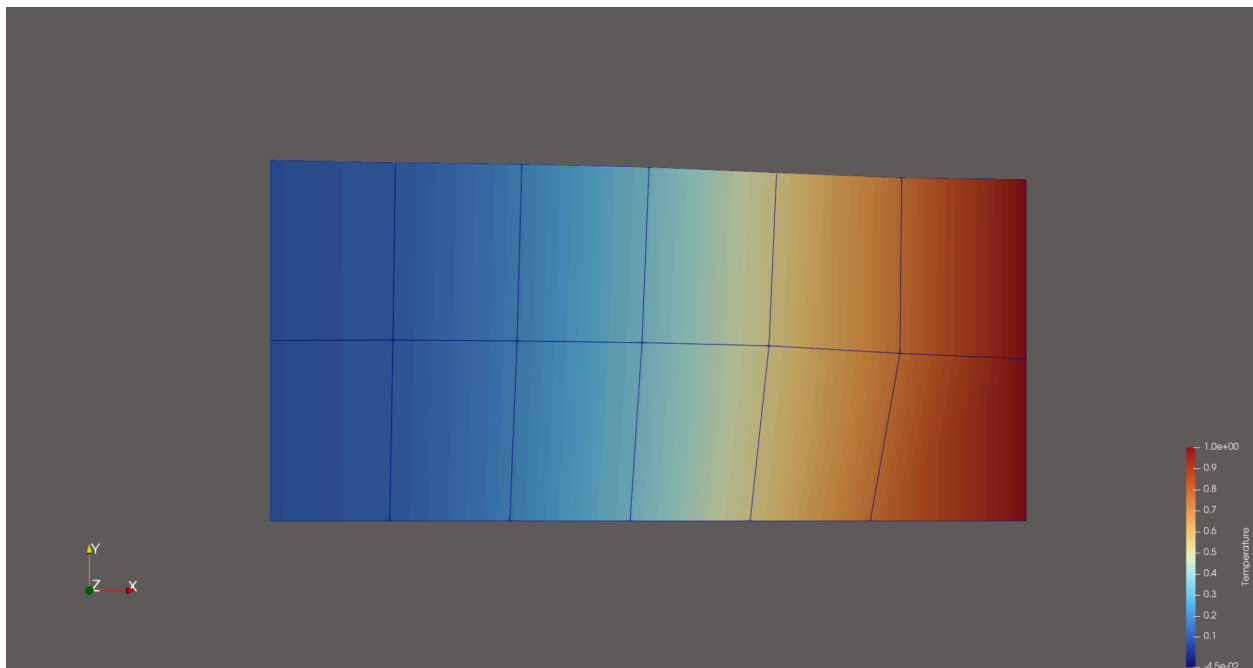

**Part 2:**

Displacement field applied directly in 1 increment (deformed configuration) -

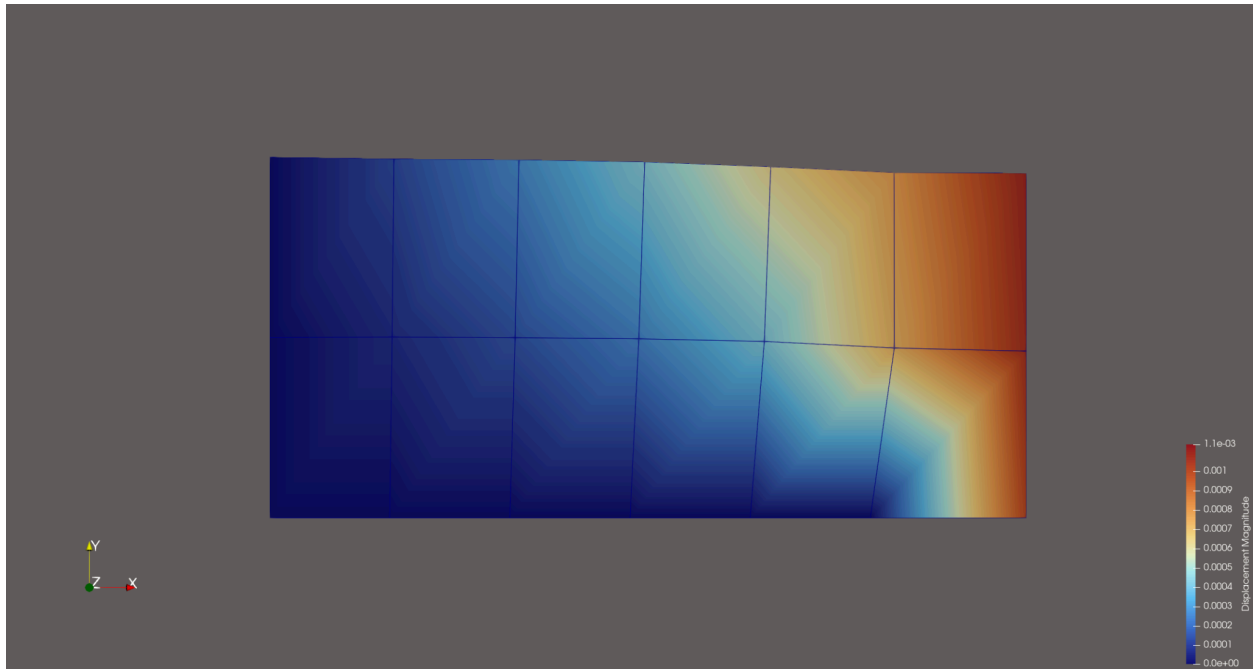

Temperature field (at the end of 50 timesteps,  $dt = 1e-6$ )  
(substitute  $\alpha_C = 0$  (3x3 matrix) ;  $DC = 0$  in the code)

**Part 3:**

Displacement field applied directly in 1 increment (deformed configuration) -

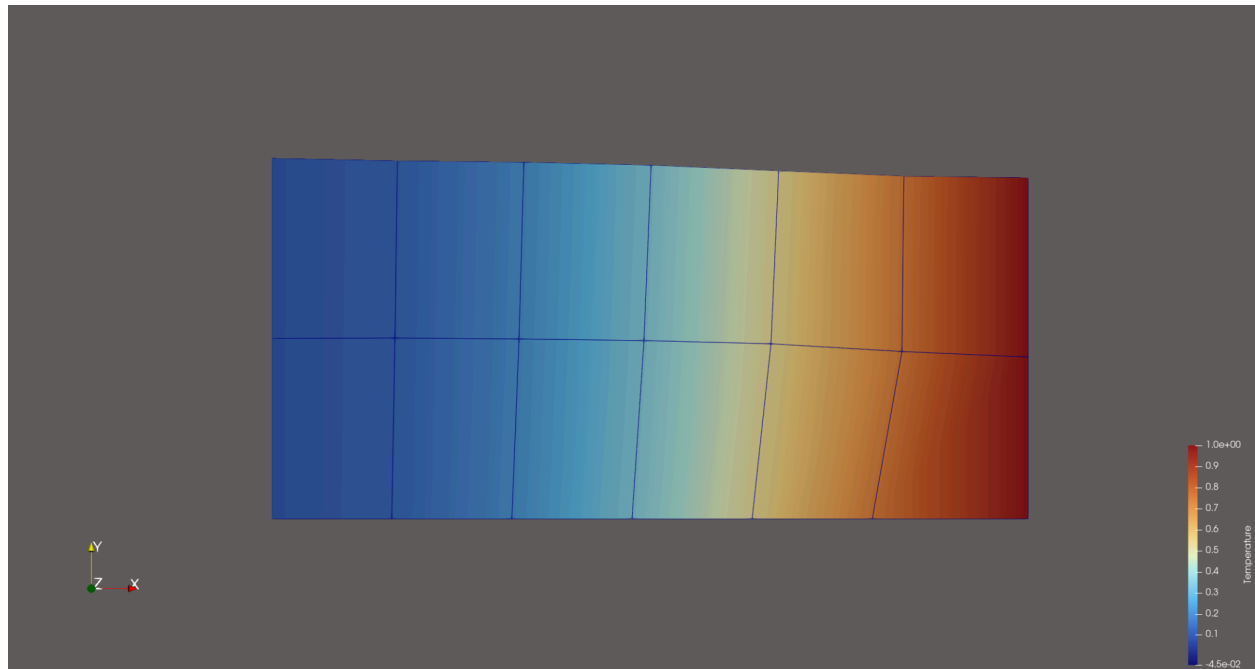

Concentration field (at the end of 50 timesteps,  $dt = 1e-6$ )
