

Part 1:

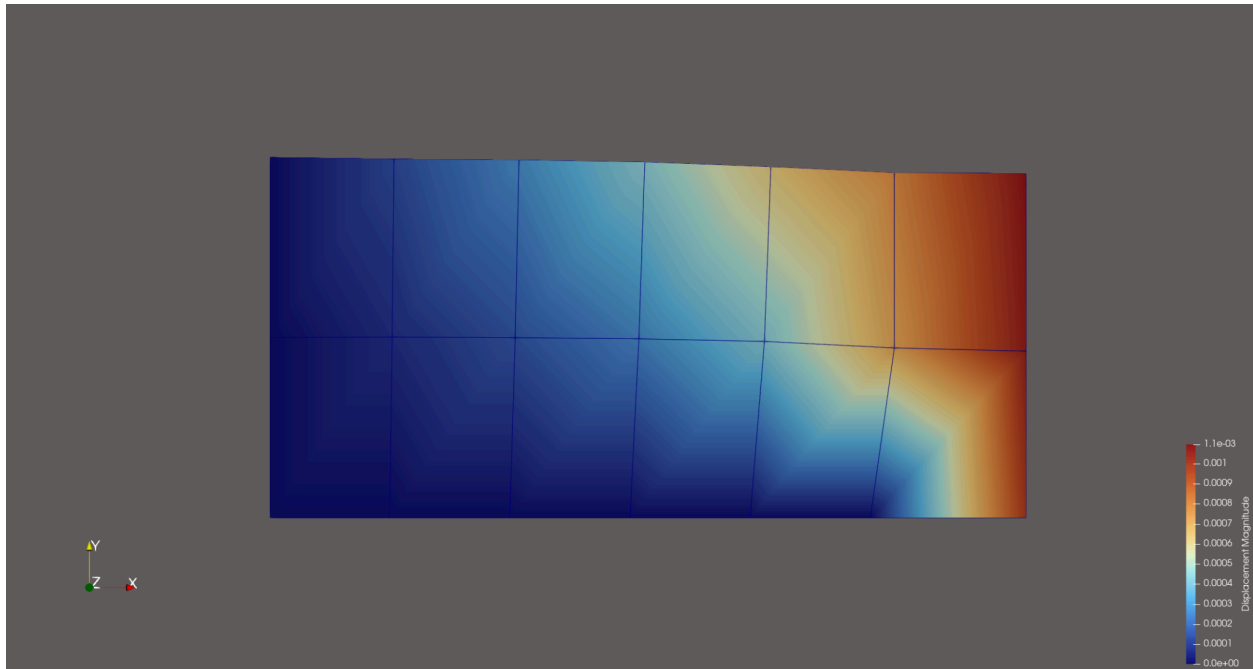

Displacement field (deformed configuration) -

(substitute $\alpha_C = 0$ (3x3 matrix) ; $DC = 0$; $\alpha_T = 0$ (3x3 matrix) ; $DT = 0$ in the code)

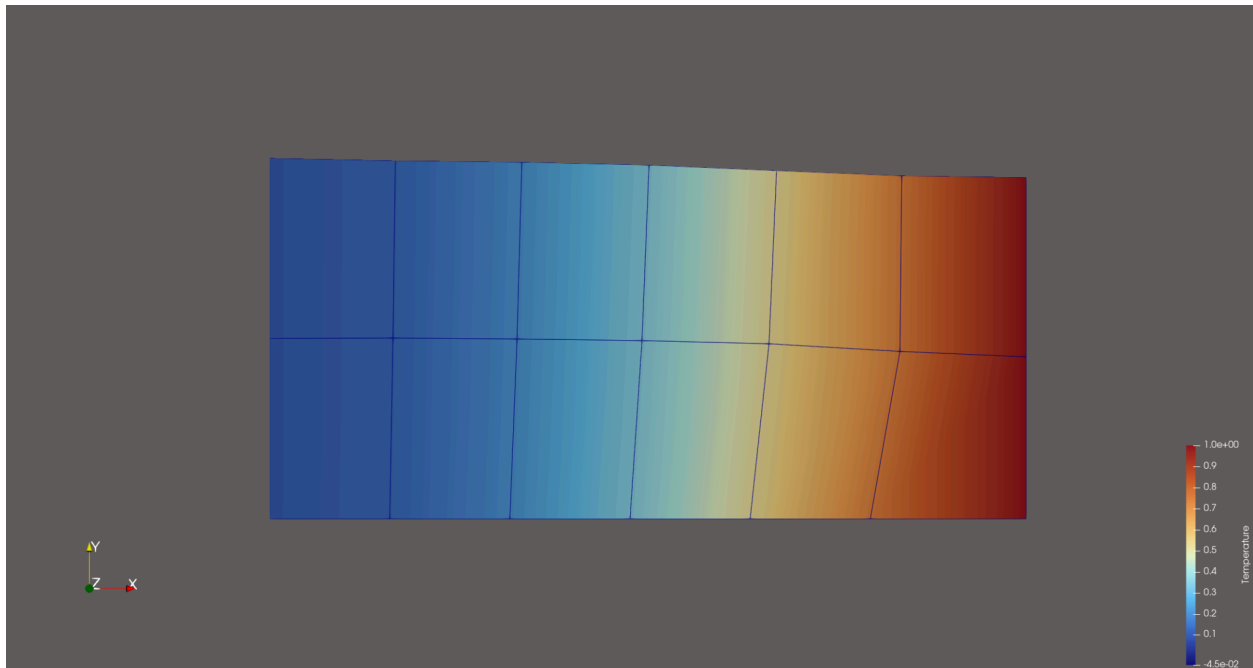

Part 2:

Displacement field (deformed configuration) -

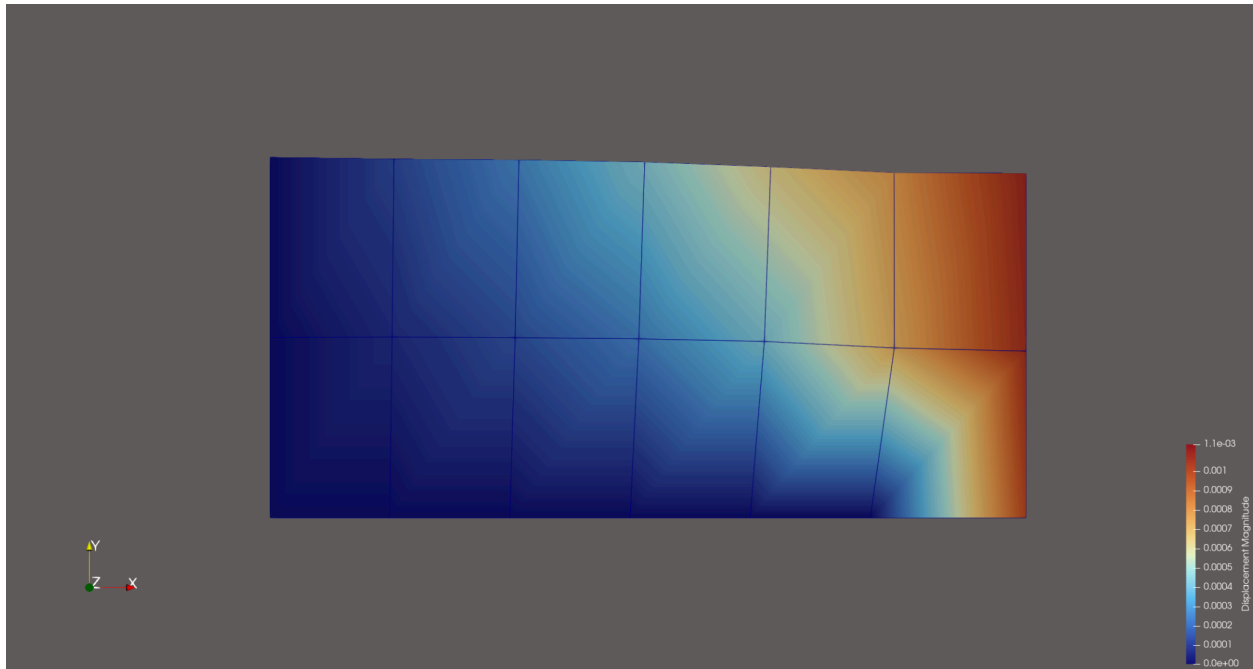

Temperature field (at the end of 50 timesteps, $dt = 1e-6$)
(substitute $\alpha_C = 0$ (3x3 matrix) ; $DC = 0$ in the code)

Part 3:

Displacement field (deformed configuration) -

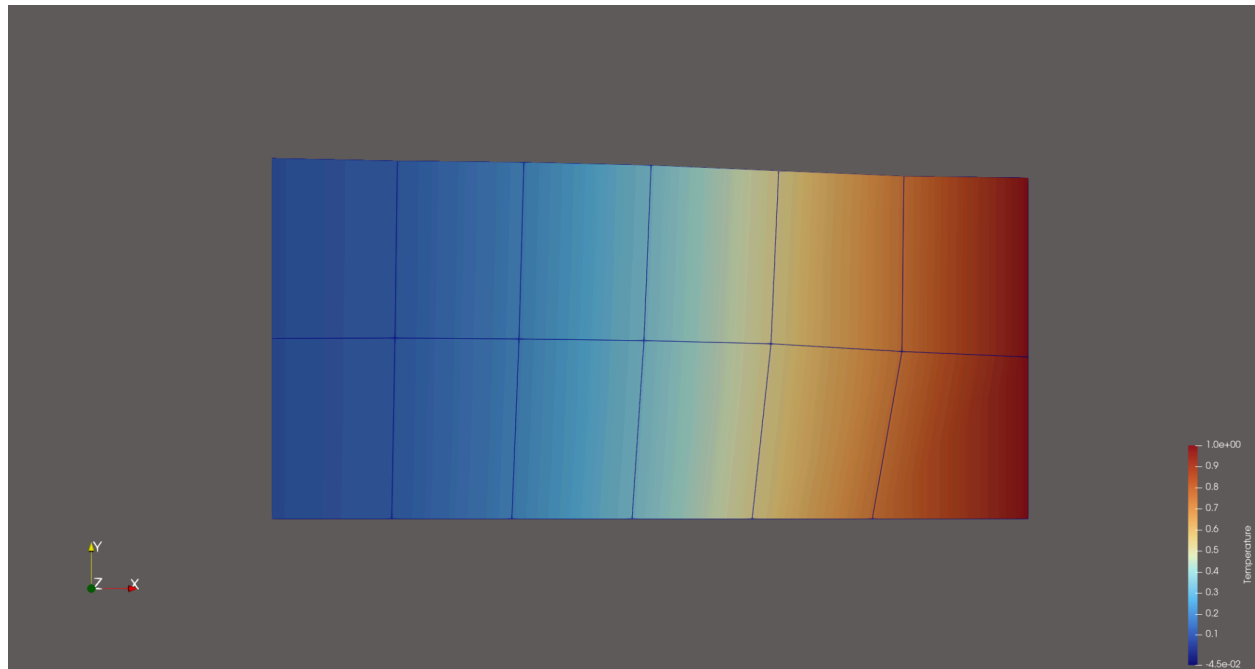

Concentration field (at the end of 50 timesteps, $dt = 1e-6$)
